How To Play Button Accordion

Enjoy learning how to play this celebrated instrument with Santorella's quick, fun and easy method! Since the button accordion is a transposing instrument, all music is written in the key of C. Therefore, once the student learns the notes & fingerings for just one scale, it can be applied to all other melodies written for any other button box. This simplifies the learning process and allows the student to make rapid progress. This unique course uses the solfège method of identifying notes as well as traditional notation for even faster learning. Santorella's Button Accordion Course by Henry Doktorski is the perfect introduction for anyone who is new to the button accordion and eager to learn how to play this wonderful instrument.

Hohner Diatonic Accordions

Diatonic button accordions, forerunner of the modern piano accordion, enjoy great popularity in the United States, Canada, and abroad. Musically, they resemble the harmonica in that they are push-pull (like blow-draw) instruments. Tone is light, full, and easily produced. All models are equipped with steel reeds on individual plates. In appearance, the German-style (and some Vienna-style) models follow the classic design that has helped make these accordions famous through the years.

COMPLETELY EXPLAINED AND FULLY ILLUSTRATED

Little information has previously been published to explain accordion repairs and maintenance. This volume is the first of its kind. It is the most thorough, full scale accordion service repair manual ever to appear in print.

It describes in detail the construction and function of various parts and how to test for and remedy practically every type of disorder which may occur in accordions. The construction of both foreign and domestic types is also thoroughly discussed.

A section dealing with alteration and reconstruction explains the use of power tools and shop equipment. It also includes instructions for making special tools and equipment to facilitate repairs. The tuning section has diagrams which show the arrangement of notes on the keyboards of almost every type of accordion, from piano, to chromatic, to diatonic.
